Work Experience

Senior Analyst, Market Supervision Department

Superintendence of Securities Market

📅 2021 – Present

📍 Lima – Peru

- Monitor securities trading on the Lima stock exchange and report unusual activities.
- Conduct research to detect illicit short-term gains by managers or directors of publicly listed companies, insider trading or price fixing practices by traders or market participants.

Regulatory Analyst, Content Operations Team

Regulatory Genome Development Limited

📅 2022 – 2024

📍 Remote, UK

- Developed information structures and collaborated with the data science team to enhance the precision of AI/ML models for the identification of obligations within legal and regulatory texts.
- Tracked legal and regulatory initiatives from securities regulators and assessed internal data structures for their adaptability to new developments.

Consultant, Finance

Mungi NGO

📅 2019 – 2021

📍 Lima – Peru

- Financial modeling of an 195 thousand acres restoration, conservation and agroforestry project in the Junin Region.
- Delivered presentations to local authorities and government organizations.

Analyst, Research and Innovation General Intendency

Superintendence of Securities Market

📅 2015 – 2021

📍 Lima – Peru

- Conducted macroeconomic research, comparative law and regulation research, economic analysis of bills and laws, and prepare drafts for bills and regulations (Crowdfunding, investment funds, sustainability report, among others).
- Leader of the team in charge of developing the draft for the crowdfunding bill, passed as law in 2020, and developing the draft of the general provisions for the bill, enacted in 2021.
- Prepared periodic reports on Peruvian securities market activity: Debt issuance, stock market trading volume, market movers, and investment funds performance.
- Delivered presentations to retail and institutional investors, students and to the general public about capital markets, regulation and the role of the SMV.

Junior Analyst, Market Infrastructure Department

Superintendence of Securities Market

📅 2013 – 2015

📍 Lima – Peru

- Monitored and tracked investment funds' strategies and performance, investment policy and regulatory requirements compliance.
- Performed daily valuations of fixed income securities and derivatives instruments on the investment funds' portfolios.
- Responsible for monitoring the correct valuation of yield curves of the Data Vendor, used as inputs for securities valuation by broker/dealers and asset managers.

Main Achievements

Securities market regulation

Drafting of the crowdfunding bill and its general provisions. Reviewed the rules for investment funds allowing external investment management and shares distribution. Drafting of the first report on corporate sustainability for companies listed on the Peruvian exchange.

AML&TF risk monitoring team

As part of an IMF technical assistance mission, I was responsible for the design and deployment of a framework to address AML risk within Peruvian brokerage firms. I led the development of a quantitative model and subsequently presented the findings to the IMF.

Regulatory quality assurance team

In charge of assessing the regulatory quality of all the regulations approved by the SMV, with special focus on rotating credit and savings associations rules and on structuring entities rules.

Reports and data analysis

Re-engineered data gathering process and developed tools that automated reports, using internal and external data sources, while keeping a close relationship with the data managers, and assessing data reliability.
